Software Engineer — Full-Stack & Systems

Professional Profile

Final-year M.Sc. Computer Science student and full-stack software engineer who ships across the stack, from React front ends to Rust systems. Builds with strong fundamentals across several languages and a habit of writing tested code. Rebuilt a business-critical data pipeline at SNCF Réseau in Python, cutting its run time by over 99%.

Projects

sprint0 — full-stack web app [GitHub]

Python, FastAPI, React, TypeScript, REST API, MongoDB

- Built a full-stack web app on a FastAPI backend and a React and TypeScript front end that talk over REST APIs and a WebSocket, turning a messy brief into a planned project with tasks and owners.
- Designed, built, and tested new features end to end, from the API and data model to the React UI.

MAFIS — Rust simulator [GitHub] [Demo]

Rust, WebAssembly, JavaScript, GitHub Actions

- Built a Rust simulator with solvers implemented from peer-reviewed research papers, compiled to WebAssembly and deployed to the web with no backend.
- Hardened it with unit, integration, and metamorphic tests and a GitHub Actions pipeline that runs them on every push.

Achievements

UQHACK CTF — 1st place out of 80 participants (UQAC, April 2026)

- Built a custom AI agent harness with skills, hooks, and scripts that drove an agent to solve the challenges and pull every flag on its own.

Laval Virtual — 3rd place out of 11 teams (student VR competition, April 2025)

Work Experience

UQAC – Research Assistant & Unity Developer *(Full-time)* December 2025 – Present

C#, Unity, NoSQL

- Built backend user-management systems with a NoSQL database and reworked the UI/UX of a user-facing research application.

SNCF Réseau – Software Engineer & Data Scientist *(Apprenticeship)* Oct. 2023 – Aug. 2025

Python, C# (.NET), VB.NET, AutoLisp

- Identified the flawed logic in a slow business-critical pipeline, rebuilt it in Python, and cut its run time by over 99%.
- Built add-ons for AutoCAD and BricsCAD in C# (.NET 7.0), VB.NET and AutoLisp.

Numérique Gagnant – Software Engineer & Technician *(Apprenticeship)* Oct. 2022 – Aug. 2023

PHP, PowerShell, Microsoft 365

- Migrated a legacy website from PHP 3 to PHP 8 and built productivity features for client companies.

Education

UQAC (Canada) – M.Sc. in Computer Science, Double Degree — final year (M2) 2025 – 2026

ESGI (France) – Master in VR & Video Game Development 2021 – 2026

Lycée Dorian (Paris) – CPGE PTSI, intensive math and physics program 2020 – 2021

Technical Skills

Languages: TypeScript, JavaScript (ES6+), Python, Rust, C# (.NET), C++, SQL

Front-end: React (Vite), HTML5, CSS3

Back-end & APIs: FastAPI, Node.js, REST API design and integration

Practices & tools: Git, GitHub, GitLab, automated testing, CI/CD (GitHub Actions), Docker

Databases: SQL (MySQL, SQLite), MongoDB Atlas, NoSQL

Interests: Bouldering, chess, complex simulations, deep-tech

Spoken: French (native) · English (fluent)
